

## What is One Solution?

An ecosystem combining within itself a decentralized fund for cryptocurrency investing, our own cryptocurrency possessing unique features, as well as a startup academy.

## Which problems do we solve?

The One Solution Fund eases the process of ICO investing, eliminates the issue of scams, opens up access to large investment discounts and bonuses.

The properties of the Solvo cryptocurrency guarantee its stable price growth and high level of volatility, which makes it a reliable and highly profitable investment instrument, as opposed to most other cryptoas-

## How do we solve them?

- One Solution Fund operations are decentralized, all managerial and investment decisions are made through voting by all Solvo coin holders.
- The initial selection of projects for investment purposes is carried out by the Fund's highly qualified experts, which are admitted to their positions by means of voting.
- The automatic mining deduction system to the Fund's portfolio guarantees the portfolios stable growth and the expansion of its investment capabilities.
- The link between the Solvo coin and the Fund's portfolio guarantees their price growth as the project develops, and quarterly dividend payouts in the size of 70% of the Funds profits guarantee high volatility during the run up to dividend distribution.

## Why One Solution?

- Easy, secure, and highly profitable investments in the best ICO's – the best experts select projects of the highest quality, participants vote on investment decisions, investments made on behalf of the fund allow for maximum privileges to be enjoyed.
- Decentralization and transparency – management lays in the hands of Solvo coin holders, all internal processes are recorded on our very own blockchain.
- Project launch – the main task of the founders, their further influence is limited based on the quantity of Fund tokens they hold, which allows them to vote on potential decisions and receive divi-

## One Solution ICO
